

Honeywell Preview Projector.

Now: view slides without a screen! Load, sort and edit faster with Honeywell's Preview Projector.

Preview screen can be used by itself to view slides without setting up a screen or darkening the room.

Slide deck next to preview screen holds a box of loose slides. Pick one, slip it into the editor and it shows up on the preview screen. If you like the way it looks, push a button and it's automatically loaded in the tray.

Preview screen also gives you a personal look at every slide before it hits screen. When projecting, you can correct upside-down slides and "ad lib" like a pro!

Quick release elevation control for fast "rough" adjustments; screw type control for "fine tuning." Lateral "tilt" control on rear left leg.

Forward-directed blower keeps "hot air" blasts away from operator. Cooling system directs air up and away.

Comes with hard control panel cover

No more refocusing. Projector automatically focuses every slide after the first. Slides can't shift out of focus.

Plug outlet automatically turns room lights off when projector is started and on at end of show.

Power cord automatically retracts.

Accepts Honeywell's 120-capacity round and 40-slide straight trays plus some other round and straight trays. 120 slide round tray provided with projector.

Brightness control for previewer system.

Model 640
\$189.50 with
4" f/2.8 lens.

Control box slides out for remote operation, remote cord provided with projector.

Built-in timer can be used to change slides at pre-set intervals of 5 to 30 seconds.

500-watt Quartz Halogen lamp and lamp ejector.

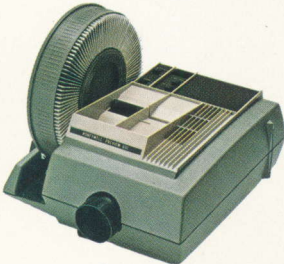

Model 630—Same as "640" except without quartz halogen lamp, automatic cord reel, room light control. \$159.50 with 4" f/3.5 lens.

Model 620—Same as "630" except without built-in timer, a preview brightness control and quick release elevation. \$139.50 with 4" f/3.5 lens.

Model 600—Same as "620" except without remote control cord, cord bag and lamp ejector. \$99.50 with 4" f/3.5 lens.

Special accessory lenses include a 3", 4" or 5" f/3.5; 4" f/2.8; 4-to-6" zoom; 3-to-5" f/3.5 zoom.

Vinyl dust cover protects projector, lens and accessories from scratches; keeps everything dust-free in storage or travel.

Sold only through authorized Honeywell dealerships.

Bring in a tray of your favorite slides from your old projector and try it out on Honeywell's new Preview Projector. (And if you're as impressed as we think you'll be, perhaps you and your dealer can work out a trade-in for your old projector.)
